Introduction

Grand Canyon National Park

Lincoln Memorial

On August 25, 1916, President Woodrow Wilson signed the act creating the National Park Service, a new federal bureau in the Department of the Interior responsible for protecting the 35 national parks and monuments then managed by the department and those yet to be established. This "Organic Act" states that "the Service thus established shall promote and regulate the use of the Federal areas known as national parks, monuments and reservations...by such means and measures as conform to the fundamental purpose of the said parks, monuments and reservations, which purpose is to conserve the scenery and the natural and historic objects and the wild life therein and to provide for the enjoyment of the same in such manner and by such means as will leave them unimpaired for the enjoyment of future generations."

The National Park Service still strives to meet those original goals, while filling many other roles as well: guardian of our diverse cultural and recreational resources; environmental advocate; world leader in the parks and preservation community; and pioneer in the drive to protect America's open space.

The National Park System of the United States comprises 375 areas covering more than 83 million acres in 49 States, the District of Columbia, American Samoa, Guam, Puerto Rico, Saipan, and the Virgin Islands. These areas are of such national significance as to justify special recognition and protection in accordance with various acts of Congress.

By the Act of March 1, 1872, Congress established Yellowstone National Park in the Territories of Montana and Wyoming "as a public park or pleasuring-ground for the benefit and enjoyment of the people" and placed it "under exclusive control of the Secretary of the Interior." The founding of Yellowstone National Park began a worldwide national park movement. Today more than 100 nations contain some 1,200 national parks or equivalent preserves.

In the years following the establishment of Yellowstone, the United States authorized additional national parks and monuments, most of them carved from the federal lands of the West. These, also, were administered by the Department of the Interior, while other monuments and natural and historical areas were administered as separate units by the War Department and the Forest Service of

the Department of Agriculture. No single agency provided unified management of the varied federal parklands.

An Executive Order in 1933 transferred 56 national monuments and military sites from the Forest Service and the War Department to the National Park Service. This action was a major step in the development of today's truly national system of parks—a system that includes areas of historical as well as scenic and scientific importance.

Congress declared in the General Authorities Act of 1970 "that the National Park System, which began with the establishment of Yellowstone National Park in 1872, has since grown to include superlative natural, historic, and recreation areas in every region...and that it is the purpose of this Act to include all such areas in the System...."

Additions to the National Park System are now generally made through acts of Congress, and national parks can be created only through such acts. But the President has authority, under the Antiquities Act of 1906, to proclaim national monuments on lands already under federal jurisdiction. The Secretary of the Interior is usually asked by Congress for recommendations on proposed additions to the System. The Secretary is counseled by the National Park System Advisory Board, composed of private citizens, which advises on possible additions to the System and policies for its management.

Nomenclature of Park System Areas

The diversity of the parks is reflected in the variety of titles given to them. These include such designations as national park, national preserve, national monument, national memorial, national historic site, national seashore, and national battlefield park.

Although some titles are self-explanatory, others have been used in many different ways. For example, the title "national monument" has been given to natural reservations, historic military fortifications, prehistoric ruins, fossil sites, and to the Statue of Liberty.

In recent years, both Congress and the National Park Service have attempted to simplify the nomenclature and to establish basic criteria for use of the different official titles. Brief definitions of the most common titles follow.

Areas added to the National Park System for their natural values are expanses or features of land or water of great scenic and scientific quality and are usually designated as national parks, monuments, preserves, seashores, lakeshores, or riverways. Such areas contain one or more distinctive attributes such as forest, grassland, tundra, desert, estuary, or river systems; they may contain "windows" on the past for a view of geological history, imposing landforms such as mountains, mesas, thermal areas, and caverns; and they may be habitats of abundant or rare wildlife and plantlife.

Generally, a **national park** contains a variety of resources and encompasses large land or water areas to help provide adequate protection of the resources.

A **national monument** is intended to preserve at least one nationally significant resource. It is usually smaller than a national park and lacks its diversity of attractions.

In 1974, Big Cypress and Big Thicket were authorized as the first **national preserves**. This category is established primarily for the protection of certain resources. Activities such as hunting and fishing or the extraction of minerals and fuels may be permitted if they do not jeopardize the natural values. **National reserves** are similar to the preserves. Management may be transferred to local or state authorities. The first reserve, City of Rocks, was established in 1988.

Preserving shoreline areas and off-shore islands, the **national lakeshores** and **national seashores** focus on the preservation of natural values while at the same time providing water-oriented recreation. Although national lakeshores can be established on any natural freshwater lake, the existing four are all located on the Great Lakes. The national seashores are on the Atlantic, Gulf, and Pacific coasts.

National rivers and **wild and scenic riverways** preserve ribbons of land bordering on free-flowing streams which have not been dammed, channelized, or otherwise altered. Besides preserving rivers in their natural state, these areas provide opportunities for outdoor activities such as hiking, canoeing, and hunting.

National scenic trails are generally long-distance footpaths winding through areas of natural beauty.

Although best known for its great scenic parks, more than half the areas of the National Park System preserve places and commem-

orate persons, events, and activities important in the nation's history. These range from archeological sites associated with prehistoric Indian civilizations to sites related to the lives of modern Americans. Historical areas are customarily preserved or restored to reflect their appearance during the period of their greatest historical significance.

In recent years, **national historic site** has been the title most commonly applied by Congress in authorizing the addition of such areas to the National Park System. A wide variety of titles—**national military park**, **national battlefield park**, **national battlefield site**, and **national battlefield**—has been used for areas associated with American military history. But other areas such as **national monuments** and **national historical parks** may include features associated with military history. **National historical parks** are commonly areas of greater physical extent and complexity than national historic sites. The lone **international historic site** refers to a site relevant to both U.S. and Canadian history.

The title **national memorial** is most often used for areas that are primarily commemorative. They need not be sites or structures historically associated with their subjects. For example, the home of Abraham Lincoln in Springfield, Ill., is a national historic site, but the Lincoln Memorial in the District of Columbia is a national memorial.

Several areas whose titles do not include the words "national memorial" are nevertheless classified as memorials. These are Franklin Delano Roosevelt Memorial, Korean War Veterans Memorial, Lincoln Memorial, Lyndon Baines Johnson Memorial Grove, Theodore Roosevelt Island, Thomas Jefferson Memorial, Vietnam Veterans Memorial, and the Washington Monument in the District of Columbia; USS Arizona Memorial in Hawaii; JNEM in Missouri; Perry's Victory in Ohio; and Arlington House in Virginia.

Originally, **national recreation areas** in the Park system were units surrounding reservoirs impounded by dams built by other federal agencies. The National Park Service manages many of these areas under cooperative agreements. The concept of recreational areas has grown to encompass other lands and waters set aside for recreational use by acts of Congress and now includes major areas in urban centers. There are also national recreation areas outside the National Park System that are administered by the Forest Service, U.S. Department of Agriculture.

National parkways encompass ribbons of land flanking roadways and offer an opportunity for leisurely driving through areas of scenic interest. They are not designed for high speed travel. Besides the four areas set aside as parkways, other units of the National Park System include parkways within their boundaries.

One area of the National Park System has been set aside primarily as a site for the **performing arts**. This is Wolf Trap Farm Park for the Performing Arts, Virginia, America's first such national park. Two historical areas, Ford's Theatre National Historic Site, in Washington, D.C., and Chamizal National Memorial, Texas, also provide facilities for the performing arts.

Designation of Wilderness Areas

In the Wilderness Act of 1964 Congress directed certain federal agencies, including the National Park Service, to study lands they administer for their suitability for inclusion in the National Wilderness Preservation System. Congress has now designated **wilderness areas** in 44 units of the National Park System. Wilderness designation does not remove these lands from the parks but ensures they are managed to retain their "primeval character and influence, without permanent improvements or human habitation." There are also 32 wilderness study areas under National Park Service management. Of these areas, 17 were formally transmitted for Congressional action in the Nixon, Ford, and Carter administrations in the 1970s.

The Act provides that "there shall be no commercial enterprise and no permanent road within any wilderness area...and (except for emergency uses) no temporary road, no use of motor vehicles, motorized equipment or motor boats, no landing of aircraft, no other form of mechanical transport, and no structure or installation." Wilderness areas are open to hiking and, in some cases, horseback riding, primitive camping, and other nonmechanical recreation. The Wilderness Act recognizes that wilderness "may also contain ecological, geological, or other features of scientific, educational, scenic, or historical value." Wilderness embodies spiritual, artistic, therapeutic, cultural, and many other important values as well.

Wilderness holds exciting prospects for future management of National Park Service lands. Because wilderness exists on lands of the National Park System, National Forest System, National Wildlife Refuge System, and Bureau of Land Management, it offers a common statutory basis for interagency cooperation in ecosystem management. And only the Wilderness Act mandates preservation of natural processes, making wilderness areas ideal protected core areas for ecosystems, just as national parks often provide core protection for biosphere reserves and world heritage sites. As such, wilderness areas provide important benchmark areas for scientific research and monitoring.

Growing demand for wilderness experience makes sophisticated, sensitive wilderness management essential. The National Park Service believes that wilderness management is the highest form of stewardship it can provide for the public lands in its care.

Parks in the Nation's Capital

Washington, D.C., has a unique park system. Most public parks are administered by the Federal Government through the National Capital Region of the National Park Service.

National Capital Region has inherited duties originally assigned to three Federal Commissioners appointed by President George Washington in 1790. The city's parks were administered by a variety of federal agencies until this responsibility was assigned to the National Park Service under the Reorganization Act of 1933. Most parklands in the city are included in the federal holdings, although the District of Columbia also operates parks, playgrounds, and recreational facilities. National Capital Region also administers several National Park System units in Maryland, Virginia, and West Virginia.

Related Areas

Besides the National Park System, four groups of areas exist—Affiliated Areas, National Heritage Areas, the Wild and Scenic Rivers System, and the National Trails System—that are closely linked in importance and purpose to those areas managed by the National Park Service. These areas are not all units of the National Park System, yet they preserve important segments of the nation's heritage. They are listed in Part 3 of this book.

Descriptive Listing of National Park System Areas by State

Wright Brothers National Memorial

Alabama

Horseshoe Bend National Military Park
11288 Horseshoe Bend Road
Daviston, AL 36256
205-234-7111

On March 27, 1814, at the "horseshoe bend" on the Tallapoosa River, Gen. Andrew Jackson's forces broke the power of the Upper Creek Indian Confederacy and opened large parts of Alabama and Georgia to settlement.
Authorized July 25, 1956.
Acreage—2,040, all federal.

Little River Canyon National Preserve
2141 Gault Avenue North
Fort Payne, AL 35967-3673
205-845-9605

The preserve protects the natural, recreational, and cultural resources of the Little River Canyon of northeast Alabama. A variety of rock expanses, benches, and bluffs create a unique environment for several threatened and endangered species and for recreational pursuits, including kayaking and rock climbing. Hunting, fishing, and trapping are permitted.
Authorized Oct. 24, 1992.
Acreage—13,699 Federal: 8,580 Nonfederal: 5,089.

Natchez Trace National Scenic Trail
(See Mississippi)

Natchez Trace Parkway
(See Mississippi)

Russell Cave National Monument
3729 County Road 98
Bridgeport, AL 35740-9770
205-495-2672

An almost continuous archeological record of human habitation from at least 7000 B.C. to about A.D. 1650—Transitional Paleo to Mississippian cultural periods—is revealed in this cave.
Proclaimed May 11, 1961.
Acreage—310.45, all federal.

Tuskegee Institute National Historic Site
P.O. Drawer 10
Tuskegee Institute, AL
36087-0010
205-727-3200

Booker T. Washington founded this college for African Americans in 1881. Preserved here are the brick buildings the students constructed themselves, Washington's home, and the George Washington Carver Museum, which serves as the visitor center. The college is still an active institution that owns most of the property within the national historic site.
Authorized Oct. 26, 1974.
Acreage—57.92 Federal: 8.32 Nonfederal: 49.60.

Alaska

Alagnak Wild River
c/o Katmai National Park
and Preserve, P.O. Box 7
King Salmon, AK 99613-0007
907-246-3305

The Alagnak River flows from Kukaklek Lake in Katmai National Preserve and offers 69 miles of outstanding whitewater floating. The river is also noted for abundant wildlife and sport fishing for five species of salmon.
Established Dec. 2, 1980. Length: 69 miles.
Acreage—30,800 Federal: 26,351 Nonfederal: 4,449.

Aniakchak National Monument and **Aniakchak National Preserve**
P.O. Box 7
King Salmon, AK 99613-0007
907-246-3305

The Aniakchak Caldera, covering some 30 square miles, is one of the great dry calderas in the world. Located in the volcanically active Aleutian Mountains, the Aniakchak last erupted in 1931. The crater includes lava flows, cinder cones, and explosion pits, as well as Surprise Lake, source of the Aniakchak River, which cascades through a 1,500-foot gash in the crater wall. NO FEDERAL FACILITIES.
Proclaimed Aniakchak National Monument Dec. 1, 1978; established as a national monument and national preserve Dec. 2, 1980.
*Acreage—**National monument:** 137,176, all federal. **National preserve:** 465,603 Federal: 439,863 Nonfederal: 25,740.*

Bering Land Bridge National Preserve
P.O. Box 220, Nome, AK 99762-0220
907-443-2522

Located on the Seward Peninsula in northwest Alaska, the preserve is a remnant of the land bridge that once connected Asia with North America more than 13,000 years ago. Paleontological and archeological resources abound; large populations of migratory birds nest here. Ash explosion craters and lava flows, rare in the Arctic, are also present. LIMITED FEDERAL FACILITIES.
Proclaimed a national monument Dec. 1, 1978; established as a national preserve Dec. 2, 1980.
Acreage—2,698,000 Federal: 2,537,912 Nonfederal:106,088.

Cape Krusenstern National Monument
P.O. Box 1029
Kotzebue, AK 99752-0029
907-442-3890

Archeological sites located along a succession of 114 lateral beach ridges illustrate Eskimo communities of every known cultural period in Alaska, dating back some 4,000 years. LIMITED FEDERAL FACILITIES.
Proclaimed Dec. 1, 1978. Boundary change: Dec. 2, 1980.
Acreage—650,000 Federal: 444,993 Nonfederal: 205,007.

Denali National Park and **Denali National Preserve**
P.O. Box 9
McKinley Park, AK 99755-0009
907-683-2294

The park contains North America's highest mountain, 20,320-foot Mount McKinley. Large glaciers of the Alaska Range, caribou, Dall sheep, moose, grizzly bears, and timber wolves are other highlights of this national park and preserve. Established as Mt. McKinley National Park Feb. 26, 1917. Separate Denali National Monument proclaimed Dec. 1, 1978. Both incorporated into and established as Denali National Park and Denali National Preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Other boundary changes: Jan. 30, 1922; March 19, 1932. Designated a Biosphere Reserve 1976.
*Acreage—**National park:** 4,741,800 Federal: 4,724,637.36 Nonfederal: 17,162.64. **National preserve:** 1,334,200 Federal: 1,304,132 Nonfederal: 30,068. Wilderness area: 1,900,000.*

Gates of the Arctic National Park and **Gates of the Arctic National Preserve**
P.O. Box 74680
Fairbanks, AK 99707-4680
907-456-0281

Lying north of the Arctic Circle, the park and preserve include a portion of the Central Brooks Range, the northernmost extension of the Rocky Mountains. Often referred to as the greatest remaining wilderness in North America, these units of the National Park System are characterized by jagged peaks, gentle arctic valleys, wild rivers, and numerous lakes. With adjacent Kobuk Valley National Park and Noatak National Preserve, they form one of the largest park areas in the world.
Proclaimed Gates of the Arctic National Monument Dec. 1, 1978; established as a national park and national preserve Dec. 2, 1980. Wilderness designated Dec. 2, 1980. Designated a Biosphere Reserve (portion) 1984.
*Acreage—**National park:** 7,523,898 Federal: 7,075,276.47 Nonfederal: 448,621.53. **National preserve:** 948,629 Federal: 945,400 Nonfederal: 3,229. Wilderness area: 7,052,000.*

Glacier Bay National Park and **Glacier Bay National Preserve**
P.O. Box 140
Gustavus, AK 99826-0140
907-697-2232

Great tidewater glaciers, a dramatic range of plant communities from rocky terrain recently covered by ice to lush temperate rain forest, and a large variety of animals, including grizzly bears, mountain goats, whales, seals, and eagles, can be found within these parks.
Proclaimed Glacier Bay National Monument Feb. 25, 1925; established as a national park and national preserve Dec. 2, 1980. Boundary changes: April 18, 1939; March 31, 1955; December 1, 1978. Wilderness designated Dec. 2, 1980. Designated a Biosphere Reserve 1986. Designated a World Heritage site in 1992.
*Acreage—**National park:** 3,224,794 Federal: 3,221,979.34 Nonfederal: 2,814.66. **National preserve:** 58,406, all federal. Wilderness area: 2,770,000.*

Katmai National Park and **Katmai National Preserve**
P.O. Box 7
King Salmon, AK 99613-0007
907-246-3305

Variety marks this vast land: lakes, forests, mountains, and marshlands all abound in wildlife. The Alaska brown bear, the world's largest carnivore, thrives here, feeding upon red salmon that spawn in the many lakes and streams. Wild rivers and renowned sport fishing add to the attractions of this subarctic environment. Here, in 1912, Novarupta Volcano erupted violently, forming the ash-filled "Valley of Ten Thousand Smokes" where steam rose from countless fumaroles.
Proclaimed Katmai National Monument Sept. 24, 1918; established as a national park and national preserve Dec. 2, 1980. Boundary changes: April 24, 1931; Aug. 4, 1942; Jan. 20, 1969; Dec. 1, 1978; Dec. 2, 1980. Wilderness designated Dec. 2, 1980.
*Acreage—**National park:** 3,674,540.87 Federal: 3,611,487.27 Nonfederal: 63,053.60. **National preserve:** 418,699.30 Federal: 382,074 Nonfederal: 36,625.30. Wilderness area: 3,473,000.*

Kenai Fjords National Park
P.O. Box 1727
Seward, AK 99664-1727
907-224-3175

The park includes one of the four major ice caps in the U.S., the 300-square-mile Harding Icefield, and coastal fjords. Here a rich, varied rainforest is home to tens of thousands of breeding birds, and adjoining marine waters support a multitude of sea lions, sea otters, and seals. The visitor center is in Seward, 10 miles from the park.
Proclaimed a national monument Dec. 1, 1978; established as a national park Dec. 2, 1980.
Acreage—670,642.79 Federal: 529,273 Nonfederal: 141,369.79.

Klondike Gold Rush National Historical Park
P.O. Box 517
Skagway, AK 99840-0517
907-983-2921
(See also Washington)

Historic buildings and museum exhibits in Skagway and portions of Chilkoot and White Pass Trails, all prominent in the 1898 gold rush, are included in the park. A visitor center is located in downtown Skagway.
Authorized June 30, 1976.

Affiliated Areas

Roosevelt Campobello International Park

In an Act of August 18, 1970, the National Park System was defined in law as "any area of land and water now or hereafter administered by the Secretary of the Interior through the National Park Service for park, monument, historic, parkway, recreational or other purposes." The same law specifically excludes "miscellaneous areas administered in connection therewith," that is, those properties that are neither federally owned nor directly administered by the National Park Service but which utilize NPS assistance.

The Affiliated Areas comprise a variety of locations in the United States and Canada that preserve significant properties outside the National Park System. Some of these have been recognized by Acts of Congress, others have been designated national historic sites by the Secretary of the Interior under authority of the Historic Sites Act of 1935. All draw on technical or financial aid from the National Park Service.

National Heritage Areas

National Heritage Areas are regions in which entire communities live and work, and in which residents, businesses, and local governments have come together to conserve special landscapes and their own heritage. Through a number of independent authorities, Congress has established 15 National Heritage Areas around the country. In these areas, the National Park Service does not acquire new land. Instead, conservation, interpretation, and other activities are managed by partnerships among federal, state, and local governments and private nonprofit organizations. The National Park Service plays the role of catalyst by providing technical assistance and financial assistance for a limited period.

Each National Heritage Area is a settled landscape that tells the story of its residents. Over time the land and the local environment have shaped traditions and cultural values in the people who live there. The residents' use of the land has in turn created and sustained a landscape that reflects their culture.

These areas consist mainly of private property, though some include public parks and preserves. Protection and upkeep of these lands and properties, as well as activities such as tours, museums, and festivals, are primarily accomplished through voluntary actions. For each area, a local government agency, nonprofit organization, or independent federal commission has been recognized by Congress to serve as the "management entity" that coordinates the partners' actions. Designation as a National Heritage Area brings no federal regulation of private property.

All of these National Heritage Areas are young and constitute an ambitious experiment—a new way of conserving and enjoying the nation's natural and cultural heritage. As such, the kinds of visitor experiences available vary widely. These areas are at different stages of implementing their plans for scenic byways; walking and cycling trails; wild, scenic, and recreation rivers; interpretive and educational activities; and rehabilitation of historic buildings and districts. The visitor who explores a National Heritage Area will gain insight into how a particular part of the American experience came to be.

America's Agricultural Heritage Partnership
P.O. Box 2845
Waterloo, IA 50704

Sites in this 37-county region of northeastern Iowa illustrate the transformation that took place as mechanization paved the way for a distinctly American system of industrialized agriculture. Tractor design and manufacture, mechanized farming, corn-hog production, dairying, beef cattle feeding, and meat packing continue to characterize the region. The unique cultural histories of family farming and agribusiness are equally well represented. (Primary federal assistance is being provided by the U.S. Department of Agriculture.

Steel made a great imprint on the Pittsburgh region in the late 19th and early 20th centuries. The industry made possible railroads, skyscrapers, and shipbuilding while altering corporate practice and labor organization. There are remnants of numerous mills as well as communities founded by mill workers, many of which are linked by hiking trails and riverboat tours. The collection of sites is also known as "Rivers of Steel."
Authorized Nov. 12, 1996.

Wild and Scenic Rivers System

Public Law 90-542, of October 2, 1968, provides for the establishment of a system of rivers to be preserved as free-flowing streams accessible for public use and enjoyment. Components of the system, which may include only a portion of a river, are classified as wild, scenic, or recreational rivers. They are classified according to the degree of development on the river, shoreline, and adjacent lands. Thus a wild river shows little evidence of human activity, the river is free of dams, and it is generally inaccessible except by trail. A scenic river is one with relatively primitive shorelines but accessible in places by road. A recreational river has more development, is accessible, and may have been dammed or diverted in the past.

Once a river is designated a component of the Wild and Scenic Rivers System, the objective of the managing agency is to preserve or enhance the features that qualified the river for inclusion within the system; any recreational use must be compatible with preservation. Rivers administered by the National Park Service are units of the National Park System. Those administered by the U.S. Fish and Wildlife Service are components of the National Wildlife Refuge System.

Rivers and streams that are in state-protected systems may become units of the National System if the state's Governor asks for such inclusion. The Secretary of the Interior may then designate the river, if it is appropriate, as a unit of the system. Federally managed components of the system are designated by Acts of Congress. Usually Congress first authorizes a detailed study to determine the qualification of a river area for the system.

Acreages of the wild rivers entirely within larger units of the National Park System are not given separately. Acreages of wild rivers within the National Wildlife Refuge System in Alaska and several others are undetermined.

National Trails System

Appalachian National Scenic Trail

The National Trails System Act of 1968, as amended, calls for establishing trails in both urban and rural settings for persons of all ages, interests, skills, and physical abilities. The act promotes the enjoyment and appreciation of trails while encouraging greater public access. It establishes four classes of trails: national scenic trails, national historic trails, national recreation trails, and side and connecting trails.

National scenic trails are to be continuous, extended routes of outdoor recreation within protected corridors. The first two established under the National Trails System Act were the Appalachian and Pacific Crest trails. They wind through some of the nation's most striking natural beauty. National historic trails recognize past routes of exploration, migration, and military action.

The term national recreation trail is given to an existing trail by the Federal Government, upon application, in recognition of its role as a component of the National Trails System. Today more than 800 of these trails have been designated throughout the country. They are located in every state, the District of Columbia, and Puerto Rico, totaling more than 9,000 miles in length. Most of them, 525, are on federal lands. Of the remainder, 151 are state trails, 85 are local, 31 are on private lands, and 12 are managed by two or more entities.

Side and connecting trails provide additional access to and between components of the National Trails System. To date, two have been designated.

Since 1968, 35 long-distance trails have been studied for inclusion in the system, and 19 have been designated. The National Park Service administers 14 of them, the Forest Service administers four, and the Bureau of Land Management, one.

The National Park Service encourages all public and private agencies to develop, maintain, and protect trails. With the cooperation and support of a nationwide trails community, the vision of an interconnected, cross-country trail system will become a reality.
